Tue, 10 Jul 2018 10:44:00 GMT - The representativeness heuristic is used when making judgments about the probability of an event under uncertainty. It is one of a group of heuristics (simple rules governing judgment or decision-making) proposed by psychologists Amos Tversky and Daniel Kahneman in the early 1970s. Heuristics are described as "judgmental shortcuts that generally get us where we need to go" and quickly ...
