This special edition completed with other document such as :

celiac disease an emerging pdf -

Wed, 19 Mar 2014 23:57:00 GMT - It is not clear whether Asian populations actually have a genetic risk for CD. Celiac disease has been shown to be associated with a genetic component of an HLA DQ 2 (or DQ8) autoimmune disorder of the human small intestine . HLA genes along with non-HLA genes predispose to the disease.

Sun, 23 Mar 2014 23:52:00 GMT - A modest association between Lyme disease and celiac disease was seen both before (odds ratio, 1.61; 95% confidence interval (CI), 1.06â€“2.47) and after the diagnosis of celiac disease (hazard ratio, 1.82; 95% CI, 1.40â€“2.35), with the risk of disease being highest in the first year of follow-up.

Borrelia infection and risk of celiac disease - ALDF -

- AbstractAt present, strict and lifelong gluten free diet is the only effective treatment for celiac disease. Even small amounts of gluten (50mg/day) can be immunogenic; therefore all food and food items and drugs that contain gluten and its derivatives must be eliminated completely from the diet.
