Sun, 08 Jul 2018 05:46:00 GMT - Plant defense against herbivory or host-plant resistance (HPR) describes a range of adaptations evolved by plants which improve their survival and reproduction by reducing the impact of herbivores. Plants can sense being touched, and they can use several strategies to defend against damage caused by herbivores. Many plants produce secondary metabolites, known as allelochemicals, that influence ...

Sun, 08 Jul 2018 05:53:00 GMT - Plant Foods with Practically No Detectable B12 Analogue. Various studies have tested the foods in Table 1 for B12 analogues and found none. To my knowledge, other than in studies (described below) in which B12 or cow manure were carefully added to the growing medium of plants, no published study has shown any B12 analogues in any of these foods.
