Wed, 20 Jun 2018 12:27:00 GMT - Dissection (from Latin dissecare "to cut to pieces"; also called anatomization) is the dismembering of the body of a deceased animal or plant to study its anatomical structure. Autopsy is used in pathology and forensic medicine to determine the cause of death in humans. It is carried out by or demonstrated to biology and anatomy students in high school and medical school.

Fri, 22 Jun 2018 02:59:00 GMT - Tumors harbor multiple cell types that are thought to play a role in the development of resistance to drug treatments. Tirosh et al. used single-cell sequencing to investigate the distribution of these differing genetic profiles within melanomas. Many cells harbored heterogeneous genetic programs that reflected two different states of genetic expression, one of which was linked to resistance ...

Tue, 19 Jun 2018 10:55:00 GMT - Elkonin boxes build phonological awareness skills by segmenting words into individual sounds, or phonemes. To use Elkonin boxes, a child listens to a word and moves a token into a box for each sound or phoneme. In some cases different colored tokens may be used for consonants and vowels or just for each phoneme in the word.
