Wed, 15 Aug 2018 14:33:00 GMT - Psychology is the science of behavior and mind, including conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope and diverse interests that, when taken together, seek an understanding of the emergent properties of brains, and all the variety of epiphenomena they manifest. As a social science it aims to understand individuals and groups ...

Thu, 16 Aug 2018 06:40:00 GMT - Evolutionary psychology is a theoretical approach in the social and natural sciences that examines psychological structure from a modern evolutionary perspective. It seeks to identify which human psychological traits are evolved adaptations – that is, the functional products of natural selection or sexual selection in human evolution. Adaptationist thinking about physiological mechanisms ...

Mon, 13 Aug 2018 10:18:00 GMT - For many years our lab has studied moral judgment and decision making. More recently, we’ve expanded our research to address basic questions concerning the brain’s infrastructure for complex thought. This new research on high-level cognition examines how concepts combine to form ideas, how ideas are represented and manipulated through reasoning, the representation of propositional ...
