Fri, 12 Oct 2018 06:01:00 GMT - The AGM-88 HARM (High-speed Anti-radiation Missile) is a tactical, air-to-surface anti-radiation missile designed to home in on electronic transmissions coming from surface-to-air radar systems. It was originally developed by Texas Instruments as a replacement for the AGM-45 Shrike and AGM-78 Standard ARM system. Production was later taken over by Raytheon Corporation when it purchased the ...

Wed, 10 Oct 2018 20:22:00 GMT - Fluoride's ability to damage the brain is one of the most active areas of fluoride research today. Over 300 studies have found that fluoride is a neurotoxin (a chemical that can damage the brain). This research includes: Over 100 animal studies showing that prolonged exposure to varying levels of fluoride can damage the brain, particularly when coupled with an iodine deficiency, or aluminum ...

Fri, 12 Oct 2018 03:45:00 GMT - These findings lend support to previous work assessing drug harms, and show how the improved scoring and weighting approach of MCDA increases the differentiation between the most and least harmful drugs. However, the findings correlate poorly with present UK drug classification, which is not based simply on considerations of harm.

Fri, 02 Feb 2018 12:47:00 GMT - This article has been corrected. The original version (PDF) is appended to this article as a Supplement.. Background: Recent guidelines recommend a systolic blood pressure (SBP) goal of less than 150 mm Hg for adults aged 60 years or older, but the balance of benefits and harms is unclear in light of newer evidence.

Intensive Blood Pressure Treatment in Adults Aged 60 Years ... -

- For every life saved by mammography, as many as 2 to 10 women are overdiagnosed, meaning turned into breast cancer patients unnecessarily, along with all the attendant harms of chemo, radiation, or surgery without the benefits.
