Mon, 09 Jul 2018 08:08:00 GMT - In algebraic geometry and theoretical physics, mirror symmetry is a relationship between geometric objects called Calabi-Yau manifolds. The term refers to a situation where two Calabi-Yau manifolds look very different geometrically but are nevertheless equivalent when employed as extra dimensions of string theory.. Mirror symmetry was originally discovered by physicists.

Sun, 08 Jul 2018 19:22:00 GMT - Superstring theory is an attempt to explain all of the particles and fundamental forces of nature in one theory by modeling them as vibrations of tiny supersymmetric strings. 'Superstring theory' is a shorthand for supersymmetric string theory because unlike bosonic string theory, it is the version of string theory that accounts for both fermions and bosons and incorporates supersymmetry to ...

Mon, 09 Jul 2018 17:55:00 GMT - String theory posits that all matter and energy in the universe is composed of one-dimensional strings. These strings are thought to be a quintillion times smaller than the already infinitesimal hydrogen atom and thus too minute to detect indirectly.
