Mon, 09 Jul 2018 15:24:00 GMT - Bivalvia (/ ɛ̃ˈ b aˈv i ˈ l v i ɛ̃ˈ m /), in previous centuries referred to as the Lamellibranchiata and Pelecypoda, is a class of marine and freshwater molluscs that have laterally compressed bodies enclosed by a shell consisting of two hinged parts. Bivalves as a group have no head and they lack some usual molluscan organs like the radula and the odontophore. They include the clams, oysters ...

Sun, 08 Jul 2018 06:57:00 GMT - The face is a central body region of sense and is also very central in the expression of emotion among humans and among numerous other species. The face is normally found on the anterior (frontal, rostral) surface of the head of animals [citation needed] or humans, although not all animals have faces. The face is crucial for human identity, and damage such as scarring or developmental ...

Sun, 08 Jul 2018 05:53:00 GMT - Anatomie. Samen met het putamen vormt de nucleus caudatus het striatum dorsale, dat functioneel als één structuur wordt gezien. Anatomisch gezien worden de twee gescheiden door een belangrijke baan van witte stof: de capsula interna. De nucleus caudatus bevindt zich in beide hersenhelften, aan de wand van de zijventrikels en schrijlings op de thalamus.
